

Pablo Rueda

Data Analyst

ABOUT ME

I consider myself a curious and independent learner: from learning to code on my own, to improving my skills for my daily job. Nowadays, I am looking for new challenges for my technical skills.

WORK EXPERIENCE

Data Analysis Manager - *Odilo, Madrid, Spain*

May 2021 - present

- I designed alone the ETL pipelines to clean and/or fuse the data with python, Spark, and SQL, using AWS Glue Studio to schedule and automatize many steps of the process
- I structured the data lake (S3) with the company and 3rd party APIs data (e.g. Jira API)
- I lead the design of Business Intelligence to achieve both internal and external clients' needs using AWS Quicksight
- Working with clients understanding business needs and translating them into actionable automatic reports with SQL and/or Quicksight BI
- I found different problems in the data storage (at S3 and Quicksight) reducing the technological costs by more than a 60%
- I lead the automatization of different departments' reports using SQL or Quicksight BIs when possible, cutting in half the time spent (10 to 5 days) on reporting

Project Manager - *Nielsen, London, United Kingdom*

Jul. 2019 - Apr. 2021

Statistician (internship) - *Guardia Civil, Spain*

Sep. 2018 - Feb. 2019

Data Management (internship) - *UAM, Madrid, Spain*

Oct. 2016 - Feb. 2017

ACADEMIC EDUCATION

MSc in Statistics - *Universidad Autónoma de Madrid*

2017 - 2019

BSc in Psychology - *Universidad Autónoma de Madrid*

2013 - 2017
